

**Cultivating and refining clinical knowledge and practice: Relating the Boyer model of scholarship to the DNP graduate
C. Hollema DNP, B. Marshall, EdD, D. Napierkowski DNP, K. Prado DNP**

Teaching

- Mastery of Knowledge
- Future Healthcare Needs
 - Highly educated healthcare workforce
 - Doctoral prepared nurses
 - Dissemination of knowledge
 - Optimal learning methodology

“Latino Community based diabetes intervention: Evaluating the effects of a Latino pastor delivered diabetes education”

Application

- Evidence Based Practice
 - Problem solving
 - Integrate theory with practice
 - Impetus for understanding of current knowledge

“Current attitudes and practices among pregnant women toward influenza immunizations”

Discovery

- Pursuit of Knowledge
 - Interdisciplinary research
 - Collaboration among professionals
 - Search of new information
 - Dissemination of knowledge

“Comparison of the Wii balance board and the BESS tool measuring postural stability in collegiate athletes”

*Boyer Model
of
Scholarship*

Integration

- Interpreting Knowledge
 - Critical analysis
 - New insight to reflect on established research
 - Closely related to scholarship of discovery

“Economic impact of an intravenous team in reducing central line associated bloodstream infections”
